

Administrative Regulation

Voter Registration of Students on Campus

Students will be permitted to register as voters while on secondary school campuses within the district, subject to the following guidelines:

- A. Registration shall be conducted before class sessions begin, during the lunch period, or after the last class sessions.
- B. Deputy registrars shall be nonpartisan officers in student government, PTSA, PTO, or League of Women Voters, or individuals belonging to similar organizations.
- C. No class groups are to be encouraged or required to participate in official registration projects or similar activities other than those of purely educational interest.

It is expected that programs of classroom instruction will be designed to complement and define the need for, and process of, voter registration as it affects the young voters.
